

# Pre-terminated Fibre Solutions

## Ruggedised MTP® Assemblies

Intex pre-terminated assemblies are an innovative evolution of the popular Fibrefox MTP assemblies. The unique connector housing (patent pending) not only prevents damage to the connector during installation, but also provides a rugged pulling eye. Then, once installed, the cap incorporating the pulling eye can be removed, and the housing becomes a permanent protection cover for the MTP connector, locking onto specially designed panel mount bulkheads with a simple twist action.

The integrated strain relief gives the added benefit of allowing the use of standard internal/external loose tube cables – offering a wide range of cost effective cable types ranging from OM1 (62.5/125) through to OM4 (50/125) and OS2 (9/125).

The Fibrefox System is manufactured in our advanced fibre termination facility under stringent laboratory conditions, and is quality controlled to rigorous standards using advanced interferometer inspection equipment.

### Features and Benefits

- Unique patent pending system
- Rugged construction
- Internal/external cable
- Integrated pulling eye
- Singlemode & multimode options
- Rapid fibre deployment
- Any length can be made to order
